

With a Bigfoot onboard you'll monster any surface

Make light work of any surface using the *OptiTraction* footprint
with a Bigfoot Central Tyre Inflation System

BIGFOOT
CENTRAL TYRE INFLATION SYSTEMS

In the mud, the sand, the snow and on the road... with Bigfoot onboard you're the master of traction on any terrain

Drivers all over the world choose the **BIGFOOT CENTRAL TYRE INFLATION SYSTEM** so they can match the tyre pressure to the speed and the weight of the vehicle on any road surface - at the touch of a button. For over 25 years the Bigfoot system has proven itself over millions of miles covered in all corners of the globe and is the first choice for operators who demand accuracy, endurance and ease of use.

Why do you need adjustable tyre pressure?

The benefits of using Bigfoot's **OptiTraction** system are to monitor and adjust your tyre pressures to suit the operating conditions and terrain. Running the wrong pressures has serious detrimental effects on your plant, your drivers, the environment and your vehicle running costs.

Potential Owner Operator Benefits:

- Increase traction, improves vehicle mobility and utilisation
- Higher off-highway travel speeds
- Improves driver comfort
- Reduced vibrational damage and shock loading
- Increase tyre life

Potential Benefits to the Forest Owner:

- Reduced road construction costs
- Lower road maintenance requirements and costs
- Reduces environmental impact
- Extends hauling season

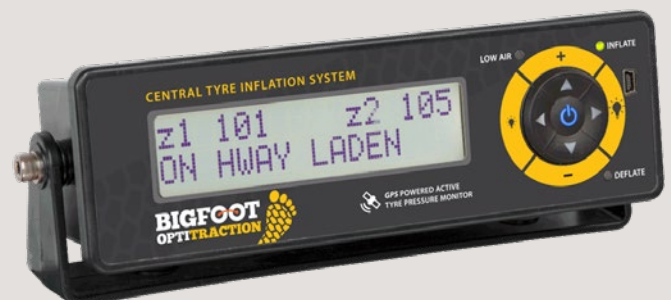

Features

- Designed and tested in some of the worlds harshest conditions
- Adjustable 'on the fly', no stopping required
- Easy to use in-cab control unit
- Built in safety features to prevent operation outside safe limits for selected tyre pressure
- Precision manufactured in New Zealand using on the finest materials and components
- Full after sales service and parts network
- Full manufacturers warranty

Ideally suited for:

- Logging
- Livestock
- Groundspreaders
- Roading
- Agriculture
- Mining/Quarries
- Rescue Vehicles
- Tourism Operators

Powered by Bigfoot OptiTraction

The brain behind the Bigfoot system is the Bigfoot **OptiTraction** control module. The display can be flush or surface mounted and makes monitoring and adjusting tyre pressures simple. The display also provides visual and audible alarms.
